

512 Hz Mini DuraSonde Transmitters

For locating in cast iron and non-metallic

The smallest snakable transmitters in our 512Hz line. These mini transmitters still have the power to get the job done. The FM-05 will help you locate in 3/4 inches cast iron and nonmetallic lines and allow you to pass through P-traps and tight elbows. The FD-10 is perfect for locating in lines as small as 2 inches.
