Stainless Steel Handy Hook

Handy Hook

Handy Hook II

The dual pronged Handy Hook™ II is a multi-purpose lifting tool. The prongs provide stability while lifting riser covers or septic tank lids.

Handy Hook™ & Handy Hook II features:

Grips:

- Bright color, easy to see
- Comfortable, smooth, durable vinyl softens impact

Handle:

- 1" x 11" steel
- Big enough to grip with both hands even when wearing gloves

Shaft:

- 1/2" round alloy steel
- Resists permanent bends
- The steel handle and shaft are threaded and welded to ensure a secure connection and alignment.

Handy Hook™ II

Size	Item	Price
30"	HHII30	\$37.00
45"	HHII45	\$40.00

PFO Hook™

The PFO Hook™ was designed for raising and lowering pumps, filters, and other items into and out of hard to reach places such as lift stations. This hook can be used to hook and raise pump floats thereby turning on the pumps and evacuating the area during service work or testing.

Two integrated handles make this hook easy to manage when reaching deep down into a hole. The middle handle allows the operator to maintain good lifting leverage.

Three different ends are available. The pump hook end is designed to hold pumps securely while lifting. The single and double hook ends are designed to reach between the filter baffles allowing the filters to be extracted.

Pump Hook™ features:

Highlights:

- 3/8" round high strength steel alloy
- Resists permanent bending
- 72" long
- One piece construction
- Two handles for ease of use
- Specially formed tips

Size	Item	Price
72"	PFO72P	\$40.00*
72"	PFO72S	\$40.00*
