

# Top Popper™

## In-line Handle

30"  
with  
extra  
bend

Size	Item	Price
24"	TPOP24L	\$26.00
30"	TPOP30L	\$28.00
30"	TPOP30LB	\$30.00
36"	TPOP36L	\$30.00

## Rotated Handle

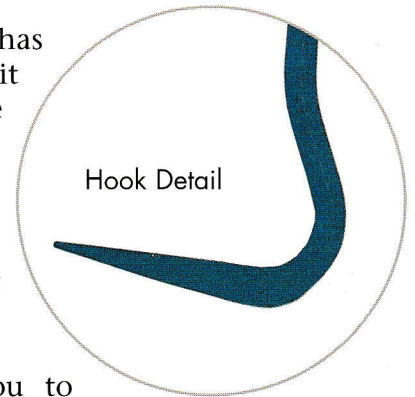

30"  
with  
extra  
bend

Size	Item	Price
24"	TPOP24R	\$27.00
30"	TPOP30R	\$29.00
30"	TPOP30RB	\$31.00
36"	TPOP36R	\$31.00

## Heat Treated

The Top Popper's unique design has a special tapered end that makes it narrow enough to enter the smallest openings yet strong enough to hold up to the largest of lids. The end has a special rocker design that creates an improved fulcrum point, making "popping" the covers easier.

An oversized handle allows you to wear gloves and still have ample room for your fingers.

## The Top Popper is heat treated

Heat-treating the Top Popper significantly increases the strength of the hook, thereby creating a durable long lasting tool while reducing the chance of bending. It is a significant step that is often skipped to save money.

The 30" Top Popper is now available with an extra bend. This extra 15 degree bend makes it even easier to get the tip of the hook into the hole.

## Top Popper™ features:

### Material:

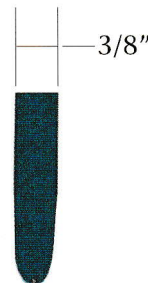

- 5/8" hex alloy steel
- Heat treated for durability
- Bright color, easy to see

### Head:

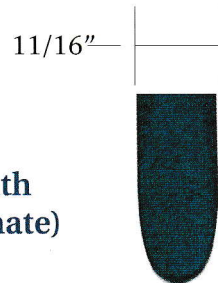

- Forged tip for inserting in small openings
- Special rocker head provides additional leverage for "popping" open even the most difficult covers

### Handle:

- Oversized "D" handle for gloved hand
- In-line handle (Lays on the ground flat)
- Rotated handle = improved ergonomics (end may point up)
